SUMMARY

Data Analyst with Microsoft PL-300 and Google Business Intelligence certifications, skilled in SQL, Python, Power BI, and data visualization. Completed an Amazon-sponsored people analytics externship analyzing employee feedback, with end-to-end projects built on 5M+ records across real estate, hospitality, and customer support data.

EXPERIENCE

SQL & Database Architecture Extern **Nov 2026 – Present**

Extern (Breaking Games externship) *Remote, UAE*

- Designing a relational database from six raw e-commerce CSV exports and writing SQL across linked tables.
- Building an HTML dashboard and a data-backed marketing and inventory recommendation for a game company.

Operational Strategy & People Analytics Extern **Sep 2026 – Nov 2026**

Extern (Amazon-sponsored externship) *Remote, UAE*

- Collected and cleaned unstructured employee feedback from 4 public sources (Glassdoor, Indeed, Reddit, YouTube) using Python (Pandas) in Google Colab.
- Performed sentiment analysis (TextBlob, NLTK), thematic analysis, and friction mapping to identify root causes of frontline frustration, including burnout, communication gaps, and role clarity issues.
- Developed employee personas and designed a low-cost intervention usable by team leaders and operations managers.
- Communicated data-backed recommendations through insight memos and a consulting-style pitch deck.

PROJECTS

Dubai Real Estate Analysis | *Power BI, Power Query, Excel* **Aug 2026**

- Cleaned and transformed 93K+ Dubai property transactions (Jan 2020 – Apr 2026) in Power Query and Excel, engineering price-per-sqft and rental-yield fields.
- Built a 4-page Power BI dashboard covering market trends, pricing and yield, fastest-growing areas, and off-plan developer activity, using Key Influencers to identify location price drivers.
- Found an inverse price–yield relationship: communities like Sustainable City and Dubai South returned ~10%+ gross yields against an 8.25% average, while off-plan averaged ~$700/sqft vs ~$508 for secondary.

Airbnb Market Analysis | *MySQL, Power BI* **Sep 2026**

- Cleaned 279K+ listings and 5.37M reviews in MySQL, handling NULLs, standardizing 662 inconsistent host-location values, and engineering an amenity-count field.
- Built a Power BI semantic model and used Key Influencers analysis to identify cleanliness (+13.3 pts), accuracy (+13.3 pts), and communication (+11.0 pts) as the strongest drivers of review score, ahead of price and location.

Google Fiber Repeat Call Analysis | *BigQuery (SQL), Power Query, Power BI* **Aug – Sep 2026**

- Cleaned and combined 3 market datasets in BigQuery, with data quality checks, into one analysis-ready table.
- Documented stakeholder requirements, project requirements, and a dashboard strategy, then designed a low-fidelity mockup before building an interactive Power BI dashboard with market, problem-type, and time-period filters.
- Found 20K repeat calls from 65K initial contacts (~31%), with Market 1 driving ~63% of them, mainly Internet & Wi-Fi issues; recommended prioritizing first-contact-resolution training there.

SKILLS

- **Programming:** SQL (MySQL, PostgreSQL, BigQuery), Python (Pandas, NumPy, Matplotlib, Seaborn), R
- **BI & Data Visualization:** Power BI (DAX, Power Query), Tableau, Excel (Pivot Tables, XLOOKUP)
- **Analysis:** Data cleaning, ETL (Power Query, SQL), EDA, statistical analysis, data modeling, KPI reporting, sentiment analysis (NLTK, TextBlob), stakeholder communication
- **Familiar with:** AWS S3, AWS Glue | **Languages:** English, Arabic, Hindi

EDUCATION

B.Tech, Computer Science & Engineering **2021 – 2025**

Allenhouse Institute of Technology (affiliated with AKTU), Uttar Pradesh, India

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Google Business Intelligence and Google Data Analytics Professional Certificates
- Google Advanced Data Analytics Certificate (In Progress)
- **Job Simulations (Forage):** Deloitte, BCG X (2), TATA, Citi, British Airways
